

Tough Tires for Tough Jobs

Bobcat[®]
One Tough Animal

Keep Rolling on Bobcat Tires

Bobcat-approved tires give you a competitive edge on any worksite. They're tough, they're rugged, and they keep you on the job even under extreme conditions like construction, demolition, recycling, foundry work and handling scrap.

Bobcat Tires and Wheels

Choosing the correct tires and wheels is essential in maintaining proper weight distribution for your Bobcat skid-steer loader. Off-brand, second-line tires often have less rubber content, thinner sidewalls, and are sometimes not the correct size to ensure proper bucket height-to-ground contact.

For dependable quality, superior traction, long tire life and all-around performance, ask your Bobcat dealer about tire models and sizes recommended by Bobcat Company. Along with tires, your dealer can also supply you with replacement tire and wheel assemblies.

Good, Better, Best

As we continue to meet customer requirements for different tires to be used in a wide range of applications, we offer the categories of “Good-Better-Best” to identify our various tire styles.

Good

Bobcat Standard Duty Tires

These pneumatic tires feature the traditional bar-lug design for excellent traction and long wear. They're good general-use tires intended for normal machine-hour applications, such as agriculture, rental, landscaping, general construction and other standard-duty jobs.

- *Sizes: 23x5.7-12, 27x8.5-15, 10-16.5 and 12-16.5*
- *Durable tread compound prevents downtime and increases productivity.*
- *Extra-thick sidewall for greater puncture resistance.*
- *Special rim guard for tire and wheel protection.*

Better

Bobcat Heavy Duty Tires

This design offers a thicker sidewall, a bead guard and a higher ply rating than other pneumatic tires. The result: better wear and resistance to flats. These tires are ideal for rough, high-hour applications: rental, construction, landscaping and industry.

- *Sizes: 23x8.5-12, 27x8.5-15, 10-16.5 and 12-16.5*
- *Strong, durable tread compound resists chunking and separation.*
- *Bobcat 3-step, self-cleaning tread for excellent traction.*
- *Super-strong double sidewall gives superior stability and reduces bounce.*

Best

Bobcat Severe Duty Tires

They're extra-thick and extra-tough for extra wear. Bobcat Severe Duty Tires are designed to take more abuse than conventional tires. They're proven performers in construction, recycling, industrial and rental applications.

- *Sizes: 10-16.5 and 12-16.5*
- *High ply rating to minimize flats.*
- *Deep tread for maximum life.*
- *Unique tread pattern allows operation in severe applications while providing superior self-cleaning action for use in soft soil.*
- *Perfect on rough pavement or in dirt.*
- *44/32-in. tread depth and a solid-to-void (STV) ratio of 68% for many hours of service in all conditions.*

Poly-Fill

Bobcat Poly-Fill Tires

Flats keep you down? With Bobcat Severe Duty Poly-Fill tires, you can go almost anywhere in your Bobcat loader without fear of a flat — and no flats means less downtime! Ideal for constant work on concrete and other hard surfaces, poly-fill tires greatly reduce hop and bounce, yet ride like an air-filled tire. They won't crumble or deteriorate when cut, they'll stand up to the most severe applications, and will outlast conventional tires.

- *Sizes: 10–16.5 and 12–16.5*
- *100% flat-proof.*
- *Poly-fill delivers same ride, footprint and deflection as air-filled tire.*
- *Totally eliminates the need for air.*
- *Guaranteed two retreads (more for your money).*

Super Float

Bobcat Super Flotation Tires

If the job requires extra flotation, check out Bobcat Super Float Tires. They'll keep you going in soft and wet conditions — anywhere extra flotation is required: parks, cemeteries, golf courses, nurseries, beaches, compost yards.

- *Sizes: 31.5 x 13-16.5, 10 PR for 700 series loaders; 33 x 15.5-16.5, 12 PR for 800 series loaders.*
- *Designed for soft, wet soil conditions where other tires can't work.*
- *Ideal for parks, cemeteries, compost yards, golf courses, nurseries, beaches, swamps — anywhere extra flotation is needed.*
- *At recommended air pressure, these tires provide 85% more footprint area than conventional tires.*

Specialty Tire

Bobcat Turf & Sand Tires

Equip your all-wheel steer loader with Turf & Sand tires for turf friendliness. This tire works well where you need to be extra ground-conscious: golf courses, sugar sand, nurseries, landscaping.

- Sizes: 33x15.5-16.5.

Offset Rims

Special offset rims permit the use of wider tires while keeping the loader width as narrow as possible. Handy in barns, industry, demolition, recycling.

Tire Specifications

	Tire Size	Ply Rating	Tire Weight	Tread Depth	Air Pressure
Standard Duty	23x5.70-12	4	15.2 lb.	11/32 in.	60 PSI
	27x8.5-15	4	26.5 lb.	12/32 in.	50 PSI
	10-16.5	8	44.5 lb.	18/32 in.	55 PSI
	12-16.5	10	63.7 lb.	21/32 in.	60 PSI
Heavy Duty	23x8.50-12	6	25.8 lb.	13/32 in.	50 PSI
	27x8.5-15	6	33.3 lb.	13/32 in.	50 PSI
	10-16.5	10	51.8 lb.	19/32 in.	55 PSI
	12-16.5	12	79.6 lb.	21/32 in.	60 PSI
Severe Duty	10-16.5	10	77 lb.	44/32 in.	40 PSI
	12-16.5	12	110 lb.	44/32 in.	40 PSI
	33x15.5-16.5	14	124 lb.	44/32 in.	35 PSI
Super Float	31.5x13-16.5	10	71 lb.	24/32 in.	30 PSI
	33x15.5-16.5	12	96 lb.	26/32 in.	35 PSI
Turf & Sand	33x15.5-16.5	10	80 lb.	18/32 in.	32 PSI
